

Git hub basics

- Initialize = `git init`
- Add to staging = `git add 'filename'`
- Commit to git = `git commit -m "Message"`
- Check status = `git status`
- Check changes in files = `git diff`
- Clone project = `git clone 'copied path from github'`
- Push to GitHub = `git remote add origin git@github.com:user/repo_name.git`
- Push to GitHub prior to initial connection = `git push -u origin main`
- Push to GitHub after initial push = `git push`
